 - ▶ Build functional tests on IOS (XCFit, Cucumberish, etc). Deploy projects on Jenkins/Firebase
 - ▶ Help engineers to develop testing framework and design testing reports using Java and web skills

SELECTED RESEARCH PROJECT

- **Global Satellite-Based Drought Monitoring and Prediction System** **06/2017-09/2017**
 - ▶ **Instructor: Associate Professor Amir AghaKouchak**
(The Henry Samueli School of Engineering, University of California, Irvine)
 - ▶ Developed web pages using charts & Google maps to demonstrate and analyze the trends & patterns of droughts across different spatial scales
 - ▶ Utilized Java, MatLab as techniques to process data and Spring-Spring MVC-Mybatis as the framework to build the websites for developing visualization portals
- **Traceless Communication and Fixed Position with Magnetic Fields System** **03/2016-12/2016**
 - ▶ **Instructor: Professor Ruiyun Yu** (Software College, Northeastern University, CN)
 - ▶ Designed Android instant message application, the specialization of which lies in its function to send message without using mobile data and Wi-Fi in a disaster situation
 - ▶ Utilized WiFi Direct, Bluetooth, routing algorithms into design, integrated with framework including bmob to design functions including instant message and SMS verification, and used MySQL as database
